## Color Management With Mac OS X

### Class Description:

In today's digital imaging workflows, it's challenging to ensure predictable and reproducible color across print, web, broadcast and CD/DVD authoring. This color management course will help design and digital imaging professionals to understand the basics of color profiling and display calibration needed to create a successful color-managed workflow. In this three-day hands-on course, you'll learn how to set up Mac OS X for color management, from capture to edit to delivery. You'll also learn how to integrate Apple and third-party solutions into a well-managed color workflow. This course covers all information necessary for the Apple Pro Certification for Color Management.

To register, please call (323) 467-1116 or use our online class request form.

**\$1295.00**

**24 Hours ( 3 DAYS)**

**Course Number:** CM101

### 2006 Class Dates:

July 10-12 (9:00-6:00)  
September 27-29 (9:00-6:00)  
November 20-22 (9:00-6:00)
